

Procurement Services

For over 50 years, Anvil Corporation has delivered multi-discipline engineering, design, project management, procurement, and construction coordination services to clients across the energy, sustainability, and manufacturing industries. Our Procurement team brings the same depth of expertise and commitment to every purchase, whether we're sourcing complex engineered equipment designed by Anvil engineers or purchasing materials and equipment specified by others.

Flexible Procurement Models

Procurement Agent Services

- Anvil acts as your purchasing agent, issuing RFQs, evaluating bids, and recommending award
- Purchase orders are issued on your paper, using your terms and conditions
- You maintain direct contractual relationships with suppliers
- Ideal for clients with established procurement systems who need experienced execution support

Direct Procurement Services

- Anvil issues purchase orders directly on Anvil paper, managing the full procurement cycle
- Title and warranty pass to you upon delivery, Anvil does not become a reseller
- Eliminates the need to build or maintain your own procurement infrastructure
- Ideal for clients who need turnkey procurement without the overhead of managing it in-house

Full-Service Procurement Support

Sourcing & Purchasing Competitive bidding, bid evaluation, supplier qualification, purchase order issuance, and change order management	Expediting & Logistics Proactive delivery tracking, supplier progress meetings, freight coordination, and transportation planning	Quality & Documentation Inspection coordination, supplier document control, QA/QC planning, and supplier document management
